Care guide

STONE MAINTENANCE

Dust frequently

Use a soft, dry cloth to dust your travertine furniture regularly. This prevents dirt and dust from accumulating on the surface.

Wipe spills immediately

Travertine is porous and can easily absorb liquids, leading to stains. Clean spills right away using a soft cloth.

Avoid chemicals and abrasives

Avoid acidic or abrasive cleaners as they can damage the stone. Always use soft cloths or sponges to clean the surface. Avoid using abrasive scrubbers that can scratch the travertine.

Use coasters and placemats

Always use coasters under glasses and placemats under plates to prevent scratches and stains from acidic foods and drinks.

Avoid heat exposure

Do not place hot pots or pans directly on travertine surfaces as extreme temperature changes can cause cracks. Use trivets or hot pads instead.

Long-term care

For deep cleaning, polishing, or repair, consider hiring a professional stone care specialist.

WARRANTY

The furniture has a 3-year warranty. Please make sure you keep your invoice or receipt. Excluded from the warranty are: Regular wear and tear, damages and natural discolouration. Colour and structure variations and other irregularities, which are part of the natural characteristics of stone. Damages caused by improper use, inadequate or incorrect maintenance, or unsuitable repairs/cleaning carried out.
